

Leverage your investment in ETI•EXTRACT® with the most experienced and knowledgeable collective of certified consultants...

Daman Consulting is the premier provider of data movement, data integration and information delivery solutions using the ETI•EXTRACT® Tool Suite. Whether you are Migrating and Converting Data, Implementing Applications, Addressing Year 2000 Issues or Building Scaleable Data Warehouses, Daman Consulting can help you leverage your investment in this powerful technology and truly make it meet your IT objectives.

ETI•EXTRACT® can revolutionize the manner in which data movement processes are developed and deployed across your enterprise, with key benefits including dramatic increases in efficiency in the development of data movement processes and dramatic decreases in maintenance and administration burdens.

However, in order to maximally profit from these benefits, it is critical to establish an appropriate infrastructure and follow an appropriate process in deploying this tool suite.

Our Proven Methodology And Process Ensure Optimal Achievement of Benefits Drawing from years of experience in deploying ETI•EXTRACT® in every conceivable context, Daman Consulting has distilled a methodology that is specific to the deployment of the ETI•EXTRACT® tool suite and allows you to optimize its use. The methodology does not replace other project methodologies but supplements them in the context where ETI•EXTRACT® is the data integration tool of choice.

The 'Situational Assessment', a key component of the Daman methodology ensures that your ETI•EXTRACT® deployment is tailored to your needs.

The assessment entails a comprehensive review and evaluation of your data integration management objectives and requirements; of source and target platforms; of development, testing, maintenance and production standards; and of source and target systems and data.

The output of this effort is an exhaustive implementation guide that will include recommendations on strategy and approach, identification of critical success factors, identification of resource, skills and expertise requirements, preparation checklists, required ETI•EXTRACT® DSLs, needed enhancements and other development activity, and a high level workplan.

Importantly, there is no 'boilerplate' for this Implementation Guide...it will be, as it should, completely specific to your context and needs.

<p>Our Implementation Experience and Expertise Give you the Advantage</p> <p>Daman Consulting is focused on tactically delivering data integration solutions using ETI•EXTRACT® as well as strategically incorporating ETI•EXTRACT® into your enterprise IT landscape as an infrastructure tool.</p> <p>Hence, in addition to the actual tasks necessary to deliver solutions using ETI•EXTRACT® (such as the installation, implementation and customization of the ETI•EXTRACT® conversion environment) a critical part of our implementation services can be the development and implementation of a strategy to facilitate the ongoing and long-term use of the tool suite.</p>	<p>In addition, we integrate the use of ETI•EXTRACT® with other tools, such as data cleansing tools and metadata management repositories, necessary to deliver a complete data integration solution.</p> <p>Our Development and Technical Strengths Ensure a Complete and Value Added Solution</p> <p>Daman Consulting has a long history of assisting ETI with their development efforts. We have been involved in important initiatives such as the integration of ETI•EXTRACT® with IBM's business intelligence solution. We are also the first ETI alliance partner to formally participate in the third-party DSL development program and are responsible for the development of the Microsoft SQL Server DSL.</p>	<p>Our Commitment to Partnership and Knowledge Transfer Ensures your Long-term Success</p> <p>Daman Consulting is committed to the long-term success of your data integration efforts through the use of ETI•EXTRACT®.</p> <p>Our objective is always to meet your data integration needs in a timely and cost-efficient manner and to deliver a solution that is robust and easily maintained.</p> <p>In order to meet this objective it is critical that YOU, the client, participate first in the development of the solution and then in extensive knowledge transfer sessions that enable us to make you self-sufficient in the ongoing use of ETI•EXTRACT®.</p>
<p>"Daman Consulting was instrumental in assisting Nationwide Insurance Company with the successful development of complex data transformation processes using the ETI•EXTRACT® Tool Suite...most importantly, they have been committed to helping our staff strengthen their knowledge of ETI•EXTRACT® and become self-sufficient in its use through aggressive knowledge transfer sessions and one-on-one coaching"</p> <p>..:"Nationwide Development Manager"</p>	<p>What this means to you is that Daman Consulting has extraordinary depth of understanding of the ETI•EXTRACT® tool suite: an understanding that is of particular importance when you need to customize and enhance the tool suite or accompanying DSLs to meet your specific data integration needs.</p>	<p>Together we can ensure that ETI•EXTRACT® is put to optimal use in meeting your data integration and movement needs.</p> <p><small>© May 1998, DAMAN Consulting All rights reserved</small></p> <p>1250 Capital of Texas Highway S.
